7. Attending to our customers' essential needs during tarmac delays

Volaris has a plan in place for tarmac delays that applies to all international flights with United States as origin or destination. This plan applies to flights departing from, arriving to or diverted from their original destination to a U.S. airport.

The U.S. Department of Transportation (DOT) has established Tarmac Delay Contingency requirements through **14 CFR part 259.4**, which are included in our plan below.

Our plan guarantees that during lengthy on-ground delays:

- We will provide lavatories in proper operating condition, and medical assistance, if needed.
- No more than two hours after the aircraft leaves the gate or has landed, Volaris will provide food and drinking water.
- No more than four hours after the aircraft leaves the gate or has landed, we will offer Customers the option to deplane, unless the pilot in command determines for safety or security related reasons that the aircraft cannot leave its position on the tarmac, or Air Traffic Control advises that returning to the gate or another disembarkation point would significantly disrupt airport operations.

These plans are coordinated with the corresponding airport authorities to ensure their proper application.

To keep you updated, our ground staff and crew will make announcements every 30 minutes to report:

- The cause of delay and the estimated time of departure, if known.
- The estimated boarding time
- If passengers have the opportunity to deplane prior to 4 hours after leaving the gate or landing

Volaris has coordinated plans with government authorities and agencies (including Customs and Border Patrol, and the Transportation Security Administration) at each airport to comply with waiting time requirements, and aircraft services and supplies.

8. Providing fair and consistent customer attention in case of denied boarding due to an overbooked flight.

Customers denied boarding due to an overbooked flight, will be compensated and treated fairly and consistently.

In case of overbooked flights, there are several established standards to minimize the inconveniencies.

These are the steps followed in case of overbooking:

First, we ask people to volunteer to change their seats and take the next flight for compensation (which will be determined by the applicable laws). If there are no volunteers, Volaris reserves the right to deny boarding in accordance with its boarding priority criteria (the last customer that checked-in would be denied boarding). Volaris will respond with compensation and re-accommodation according to the applicable laws.
